One Marder Attempted to Descoal a Desible Industries.

WILMINOTON, November 21.—Account so of a naurder perpetrated yesterday near Middletown, this county, have just been received. Early yesterday morning a colored man, theeding and covered with dirt and with two bulls holds in his head, dragged himself to a house near Vantylke's Statium, on the Queene, Anne and Kent Ralfread, man, the Colorent in an anothers. The children were diffied, and the colored ham mantloned above, in a bound of the Colorent in the

Mr. John Ceark, of Davis mill near town, met with a singular accident one day recently. He was working about the smut machine wifid the mill one the smut machine wifid to he mill was running, and standing near an apright rod to which was attached some wheel or pulley. This rod had become garamed over with the accumulations of grease; and lorgeting its nearness, while working at other machinery, his heard came in contact with it. The hair stuck, and quicker than a wink the wilskers were whisked around the rapidly revolving rod, drawing Mr. Clark is face up light against it. One of two things was invertable—either that a brach of hair should come out at the foots of the head to twisted off. Mr. Clark took in the situation, haved threself for the conflict, and out came a landful of hair, leaving a bare patch on his face about the size of a ten cent greenback. The operation was painful but soon over. And now Mr. Clark thinks a man ought to shave all over his face—at least he does so.—Boones tone? Odd Fellow.

This Benedican for the machinery and first the was of Pittsburg and Eric for ten months show a deficit in medicing liabilities of \$82,953, which is a gain over the same period of 1877 of \$213 350.

This Ropublican party has lost its majority of the vote of Pennsylvania. Hoyts vote is 319,567; whilst the votes axions him aggregate 32,471; showing a majority against the Republicans of \$2,904.

THE Republican Congressional Campain Committee did its business this year with the German-American Mational Bank of Washington, and it was a curious coincidence, to say the least, that this bank should fail just on the eye of an election in which it was a notorious fact that the committee had been pradigal in the use of money for carrying the doubtful districts for Republican candidates. And it looks curious, now, that the Government Bank Examiner should appoint as Receiver of that bank a man who, if not bis own brother-in law, is at beast, a boorlookin.

MARRIED.

Nov. 7, at the tenddence of this bid. And the confidence of Win. M. Reish, essel, and the Pittsburg, tables of Win. M. Reish, essel, and Pittsburg tables of Win. M. Reish, essel, and principle factors of the Charles are brillatine, about 200 guests because the confidence of the Charles were ball. Lawly-diaminated and a cano led did ghalf are death the confidence of solid silver pieces and full sets of solid silver pieces and full sets of solid silver serveres.

Nov. 20th, 10 the Pittsburg, by Rev. R. J. Charles of the Charl paign Committee did its business this year with the German-American No. that bank a man who, if not his own brother-in law, is at least, a brother-in-law of his wife. This looks as if there were family secrets to be kept in settling up the affairs of the bank—secrets which might, if revealed, be damaging to the party of the government. The creditors of the German-American Bank should insist upon knowing all the facts.— Eric Herald.

Honarto Skymour communicates to Harper's Magazine a paper on the proper method of punishing crime, in which he declares that our practice yielates three obvious and sample rules that should be observed. These are that crime should be punished with certainty, in the way Harper's Magazine a paper on the proper method of punishing crime, in which he be punished with certainty, in the way to make ach shrink from its commission, and that will tend to make them better rather than worse. He regards our juils as common schools of vice; and declares that in the punishment of imprisonment the sufferer is not so much the criminal as his innocrat family. He inclines to favor the lash rather than the juil for first offenses and wants the judge to be empowered by substitute at his discretion other punishment for that of imprisonment.

A restitent of Chemnitz, Saxony, mailed at that place, at seven p. in., unless that in that place, at seven p. in., unless that in the place of the property of the property of the property of the property of the punishment for that of imprisonment. be punished with certainty, in the way

mailed at that place, at seven p. in., on the 24th of May list, a postal card and JA: Off My list, a postal card and the 24th of May last, a postal card addressed to himself, carrying a request to all postmasters to despatch it successively and without loss of time to Alexandria, Singap re, Yokolama, San Francisco and New York, and thence to Chemnitz, his object being to win a wager, that with the existing postal arrangements the circuit of the world could thus be made by postal matter within one handred and twenty days. The request was compiled with, and tho card arrived in Chemnilz, from New York, on the 147th day after the date of the original mailing.

A CURIOUS AND FATAL ACCIDENT. -A peculiar accident, and fatal in its results, happened to John Bechtel, constable of Exeler township, Berks county, Friday evening. He was at work in a well on the premises of Davis Reinhart, and while the latter was cutting some boards about the mouth of the well the axe blade flow out of the handle, and falling down the opening struck Broktel on the land, killing him instantly, Bechtel was 35 years old, and leaves a wile and three children.

A wipowin had five grown daughters who wouldn't let him take a second wife. He gave up the wife but bought a savage deg, and now won't allow a man to cross his door-sill. If he can't marry, the girls shan't, he says.

FARM AND HOUSE. WHO SHALL DO IT?

Agricultural enthusiasts foretell the time in this country when the tea plant

and the folks who raise their own food your family. When milk is fed, no are secure that far. It will be a long water is required for fatheoing fowls,production in all kinds of food. There are not enough oranges grown in Florid) until they can be sold as cheaply in Minneapolis as they now are in Phila-

It may be that these changes can be light, dotted with dark. It may be that these changes can be used without going a hundred miles away from the mines or factories the change feebers of the charge feebers of the change feebers.

Exactly in the centre, between the crossed furtheir stems and the butterfly. the soil is not New England boulders or rock,) and it may be also that capital will seek and find sure investment by assisting in the growth of such agricultural villages. For the system of cultivation required for some of these new harvests will not demand large farms and consequent isolation from neighbors. On the contrary, the village system is not only the happiest, but the wisest method of farming. The houses may cluster together if the plantations stretch out in a radius from these, and what the farmer loses in time in going to his farthest field is more than made advantages of neighborhood. It would be a confession of weak in-

telligence and of little faith for any appreciable number of people in the United States to assume that a dead-lock was reached in industrial development that we have passed through, there must be a redistribution and readjustment. Who is to start on these new roads? Who is to teach the manual skill required, the judgment, the knowledge of be needed to grow the new products? They cannot be picked up in a day, nor can Americans raise tea and coffee, caltivate silk worms, and so on, as they go off hand into a clerkship or a miil,stand looms and manage machinery is it needed to teach the farmers and Twelve hours may decide the fate of planters the practical science and the theoretical also of agriculture. It a certain proportion of the population is to be occupied in this industry, it is wise not to spend time over logarithms or steam engines, but over the chemis. try and the art of farming. It is just as well to take a broad look while we Noolgar, in the Sunbury Gazette, gives are about it, and if there are too many the following cure for rheumatism: men now at work in the mines and factories and railroads, why set all the boys rhenmatism was bought from a travel.

sider all these things. - Philadelphia fourth ditto of cream tartur mixed in A STUDY OF SHEEP, -Mr. J. F. Andrews, of New Jersey, wants to know whether it would pay best to feed hay to sheep or sell it for \$15 a ton after handing it live miles; also how many ses, one of sweet milk, four eggs well Southdowns a ten would win et. A baten, three and a half enpfuls of flour, ton of suitable hay, clover, or fine two tenspoonfuls of cream tartar, one meadow, will keep four Southdowns of soda, two pounds of seedless raising. through a winter of five and a half two of currents, a quarter of a partial months. These four sheep ought to of citron, one gill of brandy, two unthours, Aness your sales, or or cities, our garden and lave four lambs, with the chances of megs, two tablespoonfuls of cinnamon six or more, and they ought to shear 21 and the same of ground cloves. Mash pounds of wool at the least calculation the sugar and butter to a cream first. The wool this year is worth in the test | This will keep six months. market 30 cents. This will make \$7.20 for the wool. The lambs in New Jersey ought to bring S5 each, but put them at practically taught in the primary and \$3,50, the price obtained 176 miles from elementary schools. There are at pres-New York for a large flock inclusive, ent twenty eight thousand of these and we have, at the lowest estimate in schools, each of which has a garden atnumbers, \$11 for the lambs. This gives tached to it, and is under the care of a a total of \$21,20 income for sheep. The master capable of imparting a knowlmanure from a ton of hay fed on the edge of the flist principles of horticalfarm to sheep is worth \$6, and if the ture. sheep are bedded with plenty of leaves A good weekly nowspaper is an edu or straw, the manure they will make cating power in the family circle seldon

Newspaper ARCHIVE®

absorb the urine, which is the strongest in chemical properties of that of any farm animals. At these figures, keeping sheep is better than hauling hay five miles for \$15 a ton; \$26.20 is more than \$15, and enough more to pay for all the rouble. More sh. sp will lessen the ratio of trouble, and not diminish the proportion of income on the basis we make, - New York Tribune.

MILK FOR FATTENING FOWLS .-What a different taste a fine, nicely and will equal the railway plant in value; quickly fattened fowl has, when served and, indeed, there seems to be nothing on the table, compared to one which has but time and opportunity needed to been forced to scratch for all its living, demonstrate that the United States can and then be consigned to the spit in maygrow all its beverages and its condition but a fit condition for food. Farments, and produce, with its varied mers realize the importance of fattening range of soil and climate, all of the quickly whon feeding beeves for the staple luxuries as well as the staple no butcher, yet many do not seem to realize cessilies of food. It seems likely that the grave problem of overproduction in mechanical industries will be settled in plied to fowls. Tenderness and Juickthis way and no other. No man can ness are results of fattening quickly, The THREE publications, one year, mand one wear seven shirts at once nor warm while mere ordinary flavor and want of

himself at seven fires, nor run his loca- tenderness result from letting fewis run motive on seven rails, but when all until wanted for use on the table, the surplus shirtmakers and spianers, To enable one to fatten fewis or chicks miners and manufacturers get to work quickly, it is absolutely necessary to on the soil, on the French system of give such food as will accomplish the United States or Canada high cultivation in small plots, when purpose best, and to this end we unthese begin to raise their own coffee and hestatingly recommend plenty of milk in any state, from fresh to thick. This and mgar, tea and molasses, in proper localities, as well as their own pork and diet, for one counteracts any possible beans, potatoes and mutton, cheese, deleterious influence of the other, If wool, corn, hemp and chickens, they kept in a darkened place and fed upwill have at least enough to satisfy the spatingly on milk, with grain in proper appetites of their families and their proportions, you will seen have someneeds of exchange. Food is the first thing very choice to effer up on your necessity, then clothes, sileter and fuel, tables, to your friends, as well as to

American Poultry Yard. CHRISTMAS GIFTS.-My sister never uses lamp-lighters, thinking they are more troublesome than useful, while I To dress according to Harper's Hazar will a the natural and ambition of the women of morries, "Hospor Transfer of the women of the Market of the women of the Market of th

Minneapons as they now are not that is delphia, and when the money that is row strips of paper collars very highly, and said software in that use them and prize a holder full of nurfees, and tens, is distributed among cut-tivators at home, the Grangers can afford to subsidize and extend the railroads, instead of cutting their throats. The country is like an overthroats. The country is like an over-grown boy in some respects of popula-tion; the jacket and trousers of a few years back, will not cover its robust proportions, and the old industries that held the population busy, cotton, woolen, iron and the few snaple foods, are showing all their seams strained to the roportions, and the old industries that a present. Taking a piece of card-board en, from and the few staple foods, are showing all their seams strained to the attent to maintain their laborers.—
What is needed is not to patch the old jacket, but to put the nation in new case of the centre at the bottom; then two gracefully drooping stems slightly crossed at the top, branching a little way. clothes that will hold it, with more day the top, branching a little way breadth of cut and amplitude of vattern. clothes that will noise it, when and supporting two lovely breadth of cut and amplitude of pattern, chains; the stems were worked in the

readth of cut and amputation and the agricultural industries, In wider range, offer this room to grow and spread in.

In a country less favored than ours, where the range of soil and clime limits in the farmer and planter to a few products, emigration has been the one answer of England, and high cultivation swer of England, and high cultivation that of France; but the United States is limited to neither, although it may find if drew a lime through the removing the patterns which is much to represent the mid-rit, should be considered.

In a country less favored than ours, base and outer potals, while the mid-stand the pistil and anthers of the darker. On another branch toward that the corners (both sides being worked alike) worked alike) worked alike) worked alike with some leaves. The pattern was cut in the card-board and mark at around, then removing the patterns in the through the centre, one side of each leaf worked in dark, the side of each leaf worked in dark, the represent the mid-rit, of the dark, with the soni by until, justified expensely and the card-board and mark in the card-board and mark in the through the ventre, one side of each leaf worked in dark, the scale of the first through the soni particles. Charles and the card-board and mark in the card-board and mark.

In a country less favored than ours, ones were of the lightest shad, and the most corners to make the card t that of France; but the United States is limited to neither, although it may find a hint in both. It must be that the overpopulation of some cities and districts must emigrate, not necessarily to far distances, but to such small farms or plantations as will famish flist their food and afterwards their other needs, plantations as wire former meds, food and afterwards their other needs, were dotted with light; the lower wings

were the words "Light the Lounp" one above another. Then, after being work- The Most Popular Scientific Paper in the World. above another. Then, after being works of in points all around the edge, it was ready for the back and bottom; the weekly, 52 Numbers a year, being back pages. ready for the back and bottom; the former nearly six inches long and two wide, the latter a semi-circular piece and to sit after the back was sewed on. anter a semi-circular plees that to it after the back was sewed on. When finished, with double replaye cord and lassels at the top to hang it by (and if desired, the same at bottom,) it was pronounced very pretty, and indeed formed quite an aranment beside the toy where Jennie hung it. It thesisson he holder could be a transported by and the formed quite an aranment beside the holder could be a transported by an area of the holder could be a transported by an area of the holder could be a transported by an area of the holder could be a transported by an area of the holder could be a transported by an area of the holder could be a transported by an area of the holder could be a transported by an area of the holder could be a transported by an area of the holder could be a transported by an area of the holder could be a transported by an area of the holder could be a transported by an area of the holder could be a transported by an area of the holder could be a transported by an area of the holder could be a transported by a tran formed quite an araument beside the stove where Jennie hung it. It desired, the holder could be made more pointed at the bottom. I think I shall make up to his family and himself by the social the next thus, for as this is the first I over saw, there is of course room for improvement. Will some young lady make for her friend, who is a busy housewife, this usoful and orannental Christmas gift? GUSSIE THOMAS,

Great Bend, Pa, solely because the tremendous development of mechanical industries has outgrown and left behind all others and has outstripped the present needs. With vice to parents—for these are mostly the TIMELY AND GOOD ADVICE -A the magnificent undeveloped resources diseases of childhood—protect the feet, vice to parents—for these are mostly the of the country, after the inevitable legs and bodies of your children well, by suitable clothing. Give them plain, substantial food, plenty of rest, with fresh air and sunshine. Discard late hours and exciting amusements and too het rooms. If your child takes cold soils, of chemistry, of weather, that will keep it at home in a pleasantly warmed To Magazine Club-Getters 100m, and admit sunlight freely. It with the cold there is some sore throat use simple remedies to promote perspiration, and a water compress about the Off hand into a cierksinp or a unita-Quite as much as industrial schools to first appearance of white or gray patch-that appearance of white or gray patchthroat. In the meantline keep a vigies send for your physician. Do not put
